

# 1.0.5064

Last Modified on 08/03/2017 1:16 pm EET

## Fixed bugs

- Deadline can be specified for SCCM available deployment when using user collection as target (deadline affects only if users have already installed any superseded versions)
- WSUS tab does not ask to save changes if no changes are done to WSUS settings
- WSUS tab is not show on SCCM integrations even if WSUS is installed to server where CSM is installed

## New features

- Self update for CSM application added
- WSUS software improvement changes applied immediately to WSUS (to current version not just to future versions)

## Other improvements

- Only unique members of collections used in SCCM collections are returned
  - CSM installation package configuration file handling
  - Log level display names for WSUS in CSM application changed
  - Start wizard texts
  - Start wizard SMTP settings are now disabled by default
-
