

Downloading and extracting the files

Last Modified on 16/10/2017 2:27 pm EEST

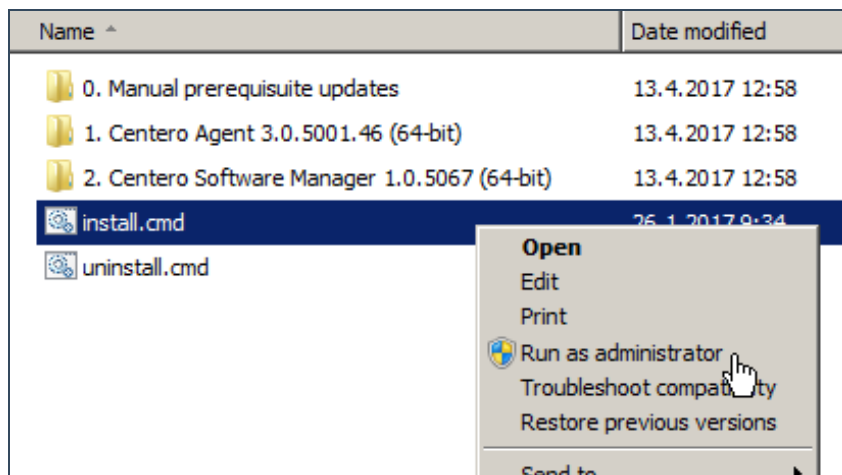

1. Download the CSM.zip from <http://portal.centero.fi/Data/CSM.zip> and save it to the server or remote console which will be used in CSM for WSUS deployment.

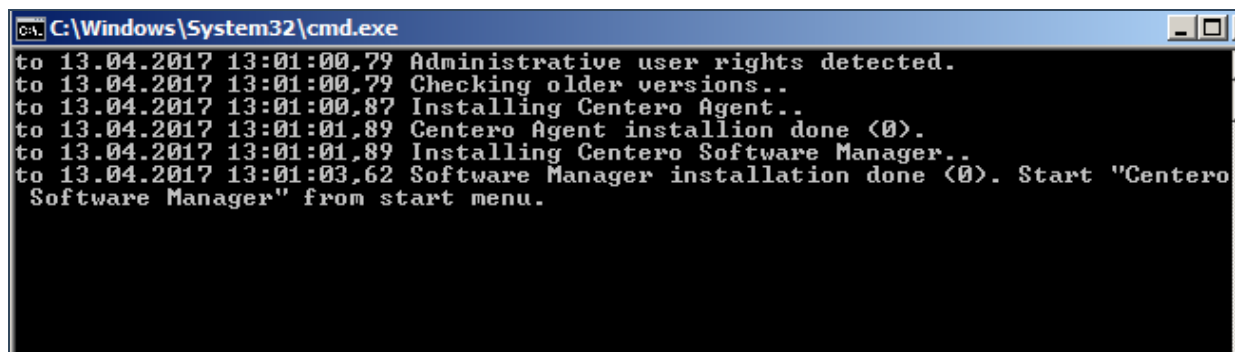

2. Extract the package and open the folder.

3. Run **install.cmd** as administrator.

4. Installation proceeds quickly and command prompt notifies when the installation is complete.

5. CSM for WSUS can be now launched from start menu.
