

CSM for SCCM - Downloading and extracting CSM

Last Modified on 02/10/2017 1:29 pm EEST

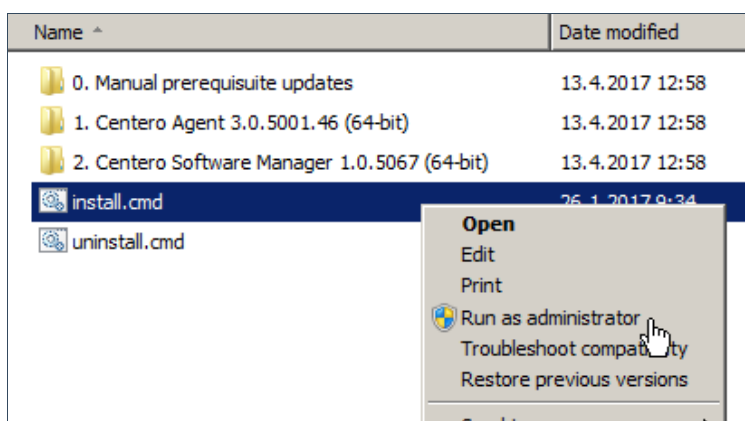

1. Download the CSM.zip from <http://portal.centero.fi/Data/CSM.zip> and save it to the server or remote console which will be used in CSM for SCCM deployment.

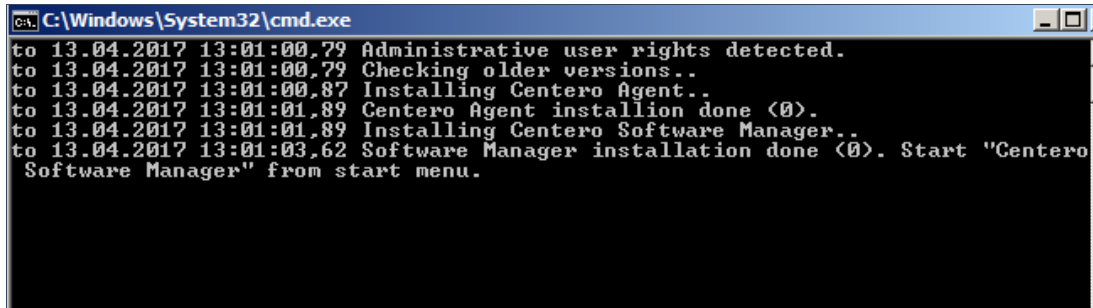

2. Extract the package and open the folder.

3. Run **install.cmd** as administrator.

4. Installation proceeds quickly and command prompt notifies when the installation is complete.

```
C:\Windows\System32\cmd.exe
to 13.04.2017 13:01:00,79 Administrative user rights detected.
to 13.04.2017 13:01:00,79 Checking older versions..
to 13.04.2017 13:01:00,87 Installing Centero Agent..
to 13.04.2017 13:01:01,89 Centero Agent installation done (0).
to 13.04.2017 13:01:01,89 Installing Centero Software Manager..
to 13.04.2017 13:01:03,62 Software Manager installation done (0). Start "Centero
Software Manager" from start menu.
```

5. CSM for SCCM can be now launched from start menu.
