

Intune Portal should not be Linked With Centro for Intune MANAGER

1. Make sure that the necessary guest account is invited to your Azure Active Directory tenant and it has the necessary role allocated. This can be done in https://portal.azure.com/#blade/Microsoft_AAD_IAM/UsersManagementMenuBlade/AllUsers.

NAME	USER NAME	USER TYPE
Service CSM	service@software-manager.com	Guest

ROLE	DESCRIPTION
Intune administrator	Can manage all aspects of the Intune product.

2. Check if the necessary applications are consented with correct permissions. This can be done in https://portal.azure.com/#blade/Microsoft_AAD_IAM/StartboardApplicationsMenuBlade/AllApps/menuld/.

Centro Azure AD Connector:

API NAME	PERMISSION	TYPE
MICROSOFT GRAPH		
Microsoft Graph	Read and write devices	Application
Microsoft Graph	Read directory data	Application
WINDOWS AZURE ACTIVE DIRECTORY		
Windows Azure Active Directory	Sign in and read user profile	Delegated

CSM for Intune:

SOFTWARE MANAGER

API NAME	PERMISSION	TYPE
MICROSOFT		
Micro	Read and write Microsoft Intune apps	Delegated
Mi	Read Microsoft Intune devices	Delegated
Microsoft Graph	Read Microsoft Intune devices	Application
Microsoft Graph	Read and write Microsoft Intune apps	Application
WINDOWS AZURE ACTIVE DIRECTORY		
Windows Azure Active Directory	Sign in and read user profile	Delegated

3. Confirm your tenant name from Microsoft

Intune https://portal.azure.com/#blade/Microsoft_Intune_DeviceSettings/ExtensionLandingBlade/tenantStatus.

Microsoft Intune - Tenant status

Search (Ctrl+/) <<

- Overview
- Quick start
- Manage**
- Device enrollment
