

# Pre-Installation Checklist

# SOFTWARE MANAGER

Last Modified

Use following check list to verify that your environment is ready for SLM installation and you have planned the deployment processes for applications.

Step name	Article
1. Verify system requirements	<a href="#">System requirements</a>
2. Verify SCCM requirements	<a href="#">SCCM requirements</a>
3. Verify SCCM configuration	<a href="#">SCCM configuration</a>
4. Choose how to name applications in Software Center	<a href="#">Software Center</a>
5. Plan and document deployment processes for applications	<a href="#">Deployment processes</a>
