

SOFTWARE MANAGER

Could not read SCCM collections from C:\ProgramData\Centero\Software Manager\SCCM\SCCM
Information.xml!

If your CSM for SCCM integration was enabled, you can try the solution 1, but if integration was disabled (usually during first time configuration), use the second solution.

Solution 1:

1. Delete the following file:
 - C:\ProgramData\Centero\Agent\Modules\4.6\CMM\ThreshDir\schedule.CollectSCCMInformation.xml
2. Wait one minute and **SCCM Information.xml** will be re-created.
3. Start CSM for SCCM.

Solution 2:

1. Delete the following file:
 - C:\ProgramData\Centero\Agent\Modules\4.6\CMM\ThreshDir\schedule.CollectSCCMInformation.xml
2. Edit C:\ProgramData\Centero\Agent\Modules\4.6\CMM\SCCM-Import.xml
 - Go to:
 - Change **disabled="true"** to **disabled="false"**
3. Restart **CenteroAgent** service
4. Wait one minute and **SCCM Information.xml** will be re-created.
5. Start CSM for SCCM.
