SOFTWARE MANAGER

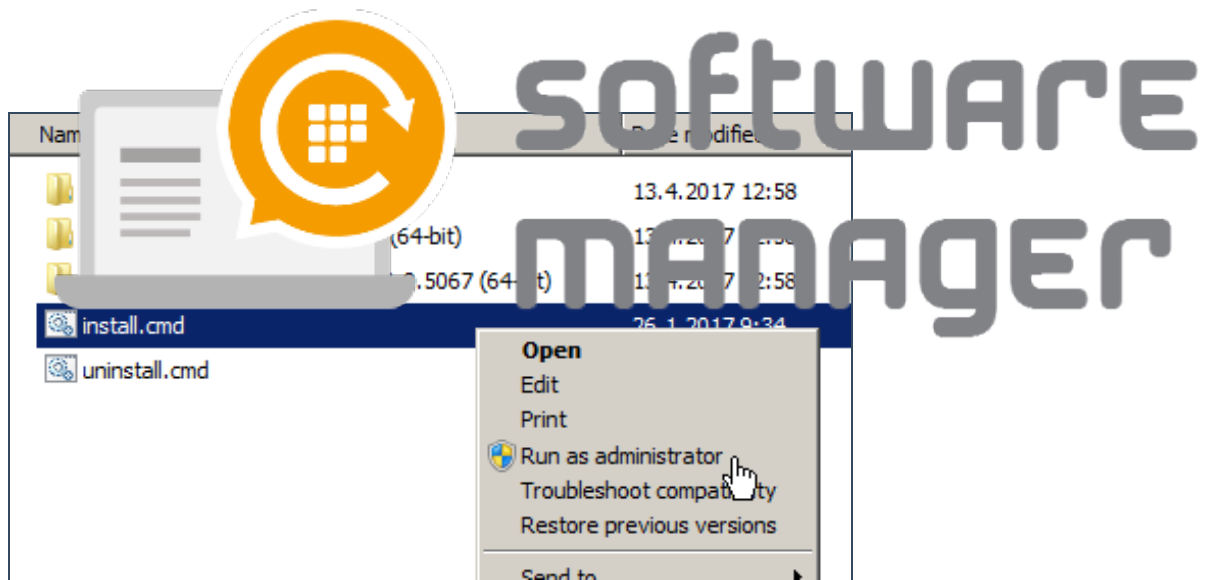

1. Download the CSM.zip from <http://portal.centero.fi/Data/CSM.zip> and save it to the server or remote console which will be used in CSM for WSUS deployment.

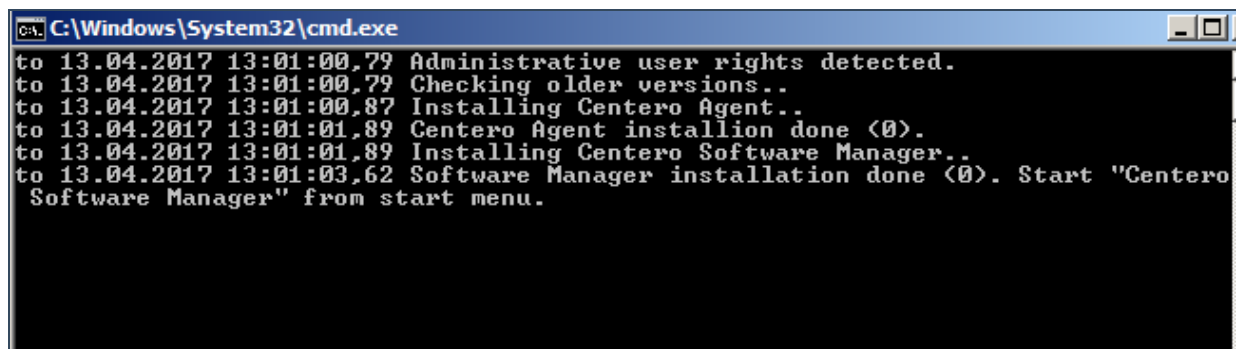

2. Extract the package and open the folder.

3. Run `install.cmd` as administrator.

4. Installation proceeds quickly and command prompt notifies when the installation is complete.

5. CSM for WSUS can be now launched from start menu.
