

## Grant Access to Azure AD on Behalf of Someone Else

Last Modified on 27/02/2023 10:46 am EET

### For Global Admin who is consenting the enterprise applications on behalf of someone else

1. Open these links with your or your customer's Azure AD global administrator account and consent:

- [Centero Azure AD Connector](#)
- [CSM for Intune](#)
- [CSM for Intune Application Groups](#)

2. Go to Enterprise applications page in [Azure Portal](#) and select **Centero Azure AD Connector**

3. Select **Users and Groups**

- 

4. Select **Add user** and find the user account of the person who is installing CSM for Intune

- If you are an MSP, you need to add the account you are using in our portal as a **guest user** into customer's Azure AD. Assign the enterprise application to your guest user account

5. Select **Assign** and continue with CSM for Intune installation

- 

[Home](#) > [Enterprise applications](#) > [Centero Azure AD Connector](#) >

### Add Assignment ...

Users and groups

1 user selected.

Select a role

[Default Access](#)

[Assign](#)

# software

6. Repeat the steps 3–5 to **CSM for Intune** enterprise application
7. Continue with the installation by following the steps in **Service status** page. The next step is to [Link Tenant With CSM for Intune](#)
  - You might see the message **Unable to check status before linking tenant (step 5)** in service status page even if have assigned the enterprise applications, but the message disappear after you've added the tenant
