New Deployment Process

Last Modified on 28/10/2022 11:22 am EEST

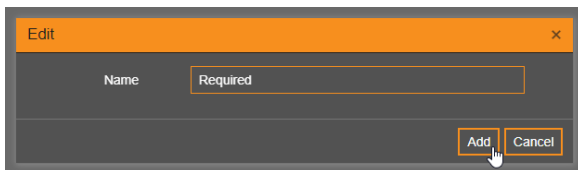

You can follow these instructions on how to create a new deployment process in CSM for Intune:

1. In Centro Portal, navigate to **Services -> CSM for Intune -> Administration -> Deployment processes** page.

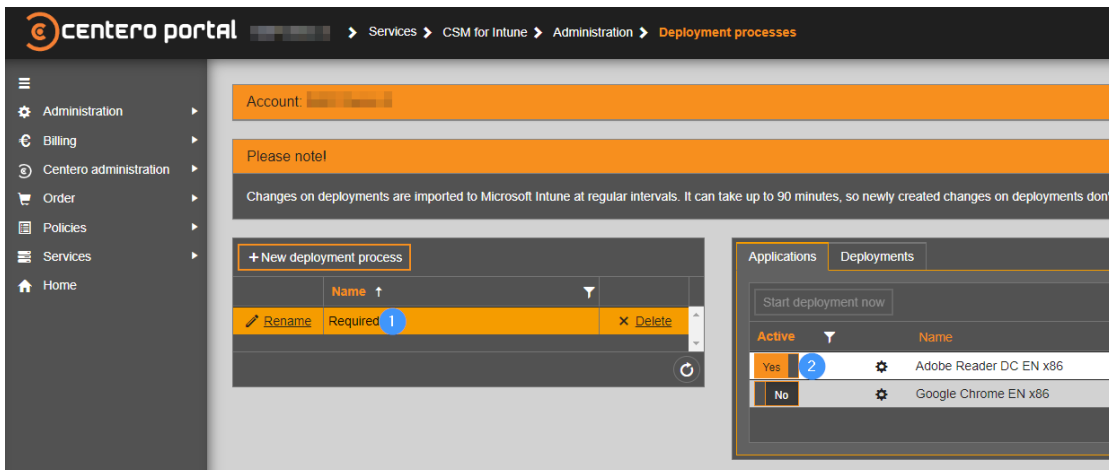

Select **New deployment process**

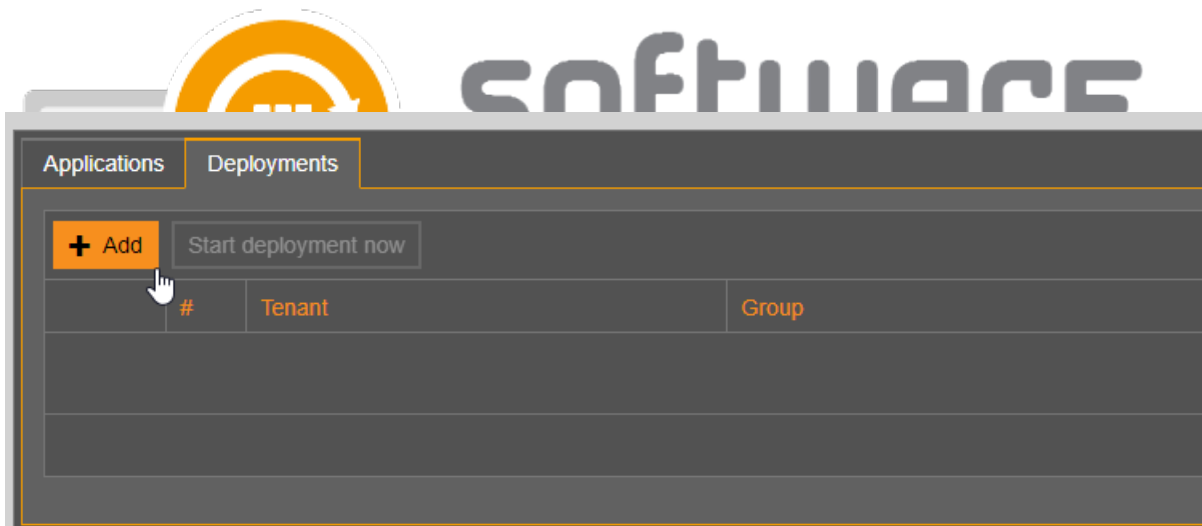

2. Set a name for the deployment process and select **Add**

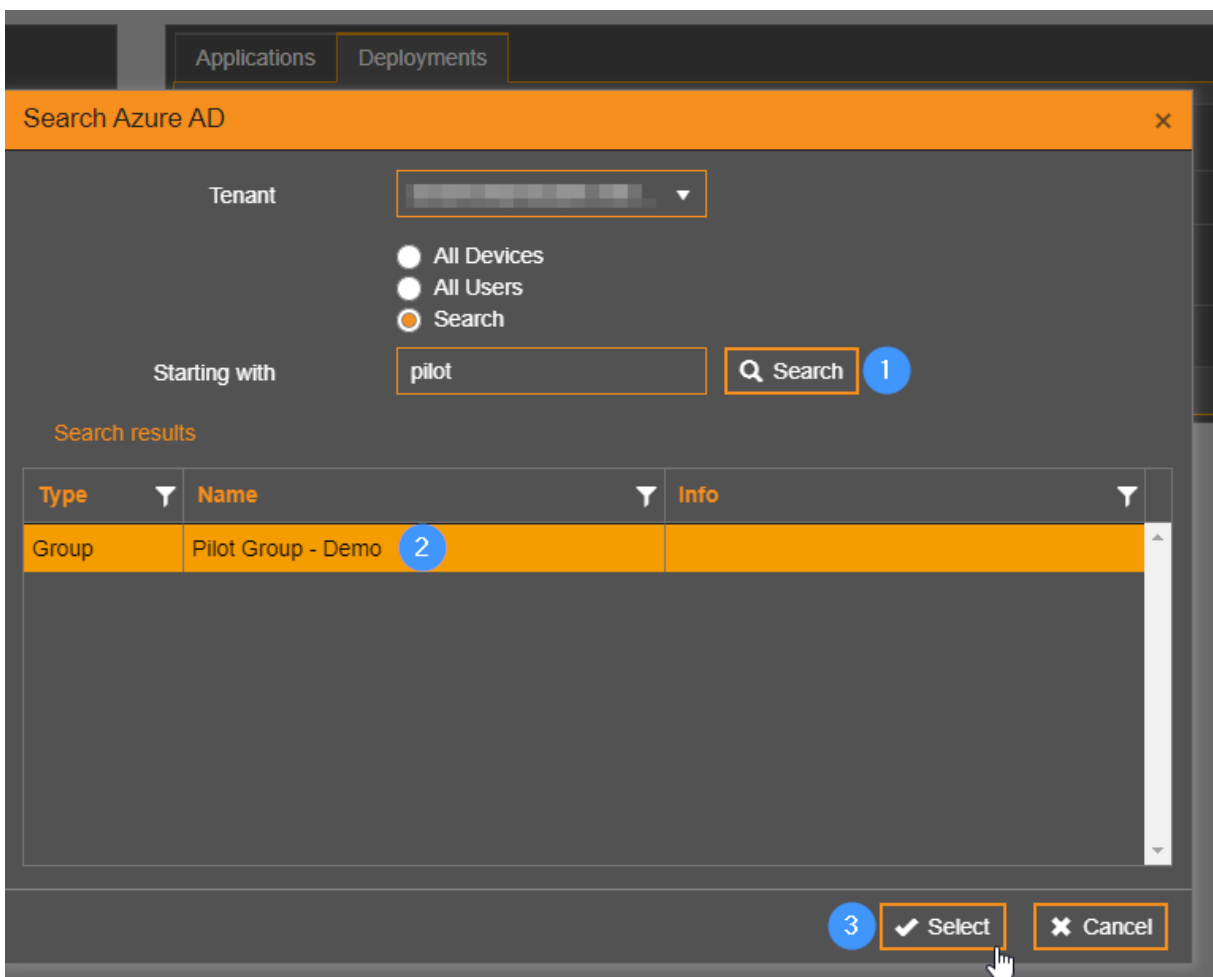

3. Click on the deployment process name and select application(s) to the deployment process

4. Go to **Deployments** tab and select **Add**

- Find the Azure AD group you wish to use as a deployment target. Alternatively, you can use Intune's native **All Devices** or **All Users** target groups.

- Configure deployment settings and scheduling. Select **Add**
 - You can find detailed instructions about deployment settings from [here](#)

Edit
✕

General settings

Group:

Assignment mode: Include Exclude

Install intent:

End user notifications:

Delivery optimization priority:

Email notifications

Deployment created:

Application created:

Errors:

Restart settings

Grace period: Yes

Countdown dialog:

Snooze duration: Yes

Scheduling

Time zone: UTC Device time zone

Application availability: As soon as possible Scheduled

Installation deadline: As soon as possible Scheduled

7. Repeat steps 4-6 to add additional target groups
8. Select **Start deployment now** if you're happy with the deployment process and want to import the application to Intune
 - In our example we've added pilot and production target groups to the deployment process
 - Pilot group schedule is set to **as soon as possible**
 - Production deployment is set to start 3 days after the previous step, allowing time for testing

Applications

Deployments

Deploy the latest versions

Changes in applications and deployment processes will take effect only when next version of an application is published. [Click here](#) to create deployments of latest versions now.

+ Add

Start deployment now

	#	Tenant	Group	Intent	Mode	
	1		Pilot Group - Demo	Required	Include	Delete
	2		Production Group - Demo	Required	Include	Delete

1 - 2 of 2 items

Simulated publish times if package was published now.

Time zone	Available	Deadline	Group	Tenant
UTC	10/28/2022 11:07 AM	10/28/2022 11:07 AM	Pilot Group - Demo	
Device time zone	10/31/2022 10:07 AM	10/31/2022 10:07 AM	Production Group - Demo
