Client Applications

Last Modified

CSM Cloud Client

CSM Cloud Client is an application both CSM Cloud and CSM Cloud for Servers need in order to work. The application needs to be installed on each device you want to manage with CSM Cloud.

In addition, you need to install CSM Cloud Client on each device from which you wish to collect inventory data for Centero Portal, regardless of the CSM product used on the device.

CSM Integration Client

CSM Integration Client is an application both CSM for SCCM and CSM for WSUS need in order to work. The application needs to be installed on a device from where it can be in constant contact via internet to the required CSM platform services, and the customer's SCCM or WSUS systems, regardless of the CSM product(s) the customer is using.
