# Remove Software Manager Cloud Client

Last Modified

## 1. Remove Software Manager Client

1. Go to **Control Panel\Programs\Programs and Features**, select **Centero Software Manager** and uninstall it.

## 2. Remove Centero Agent

⚠ **Warning!**

If other Centero products (like Centero Carillon) is installed, **do not** remove Centero Agent!

1. Go to **Control Panel\Programs\Programs and Features**, select **Centero Agent** and uninstall it.

### 3. Remove Windows Update settings

1. Make sure that the
   **HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows\WindowsUpdate** registry key
   is empty

> ▨ **Note!**
>
> Windows Update client will revert to settings specified on local device. If you need you can use GPO or
> registry editor to specify desired Windows Update client settings so that user of the device cannot change
> settings from operating system UI.
