

CSM Cloud Client Installation

SOFTWARE MANAGER

Last Modified

CSM Cloud Client is required to start using CSM Cloud and CSM Cloud for Servers services. Verify that your Windows device fulfills [CSM Cloud system requirements](#). Required installation media and CSM Cloud Client **key** can be acquired from [Centero Customer Portal](#).

1. Get installation media and key

1. Log in to the [Centero Customer Portal](#)
2. Navigate to **Services > CSM Cloud/CSM Cloud for Servers > Downloads**
3. Click **Download** link for the Centero Software Manager Cloud Client
4. Click **Get key** link to get key to link installed clients to your organization

⚠ Warning

Do not save your CSM Cloud Client key to unsecure locations and do not give this key to any unauthorized persons!

2. Installation

1. **Execute** downloaded installer with administrative permissions

2. If UAC notification is shown, provide credentials that have administrative access to Windows
3. Apply your CSM Cloud Client **key** and click **Start install** to start CSM Cloud Client installation

4. Click **Exit** to close the installer

Tip

If you want to automate CSM Cloud Client installation you can get MSI installation packages from **%ProgramData%\Centero\Media\CSM Client** folder structure. Create MST file for Centero Software Manager Client MSI package or use command line parameter to set MSI properties CUSTOMERIDENTIFIER and REBOOT. Setting MSI properties from command line use syntax:

```
msiexec /i " REBOOT=ReallySuppress /qn
```
