Decomissioning CSM for MECM

1. Go to **Control Panel\Programs\Programs and Features**, select **Centero Software Manager** and uninstall it.

   ◻

2. Go to **Control Panel\Programs\Programs and Features**, select **Centero Agent** and uninstall it.

   ◻

3. Remove the applications brought by CSM from your MECM console.

4. Terminate the CSM for MECM service by going to https://preview.portal.centero.fi, Administration - Services.

⬚ Make sure that you a plan for updating or removing the CSM supported apps. All the applications distributed with CSM service have their built-in update system disabled. This means that if you have no other tool or method to update the apps they will not get updated.
