

# SOFTWARE MANAGER

- Minor issues with CSM in full screen mode
- Minor issues with collecting SCCM information

## New features

- CSM for SCCM:
  - Support for Windows 11, Server 2019, Server 2022
  - Remove old and not needed applications from SCCM
  - This feature only removes applications in retired state and created by CSM
  - Remove old application media from CSM download path
  - Native SCCM detection methods on msp and exe type applications
- CSM for WSUS:
  - No new features

## Other improvements

- No new improvements in this release
