

Deployment Settings

Last Modified on 28/10/2022 11:18 am EEST

You can configure deployment settings when you create a new deployment to a deployment process, or edit previously created deployment. From this article you can find information about every setting in deployment settings.

General Settings

- **Group**
 - Target group name (cannot be changed)
- **Assignment mode**
 - Include (Default)
 - Exclude (Group members are excluded from the deployment)
- **Install intent**
 - Required (Default)
 - Available (Application will be available in Company Portal. Make sure to use user group)
 - Uninstall (Application will be uninstalled from the target group's members, if it's already installed)
- **End user notifications**
 - Show toast notifications for computer restarts (Default)
 - Show all toast notifications
 - Hide all toast notifications
- **Delivery optimization priority**
 - Content download in background (Default if the setting is empty)
 - Content download in foreground

Email notifications

- **Deployment created**
 - Email notification about the specific deployment
- **Application created**
 - Email notification about newly imported application
- **Errors**
 - Email notification about application import errors

Restart settings

- **Grace period**
 - Specify restart grace period for assignment
 - 1440 minutes is the default in Intune
- **Countdown dialog**
 - Specify restart countdown dialog

- 15 minutes is the default in Intune
- **Snooze duration**
 - Specify the restart snooze duration
 - 240 minutes is the default in Intune

Scheduling

- **Time zone**
 - UTC (Default)
 - Device time zone
 - Assignment scheduling time zone
- **Application availability (When the app is downloaded to Intune client)**
 - As soon as possible (Default)
 - Scheduled
 - Wait (How many days from the previous deployment step until the deployment starts)
 - Time (Configure time of day when the deployment starts)
 - Day of the week (Configure day of week when the deployment starts)
 - Day of the month (Configure day of month when the deployment starts)
- **Installation deadline (When the app is installed)**
 - As soon as possible (Default)
 - Scheduled
 - Wait (How many days from the application availability time until app is installed)
 - Time (Configure time of day when the app is installed)
 - Day of the week (Configure day of week when the app is installed)
 - Day of the month (Configure day of month when the app is installed)

Edit x

General settings

Group: Production Group - Demo

Assignment mode: Include Exclude

Install intent: Required

End user notifications: Show toast notifications for computer re...
